

Cartage made easy ! JobPlus facilitates processing and tracking of single or multi leg jobs through dispatch to rating and billing. Its flexibility ensures that it can be used equally effectively for operations ranging from container movement to general cartage to vehicle transport to ...

- **Share workload** flexibly between dispatchers. Jobs can be split between dispatchers based upon type of work, fleet and/or location. With one click, a dispatcher can switch between the types of work s/he handles or even to another dispatcher's work.
- **Increase productivity** with JobPlus's multi-leg tracking mechanisms and user-configurable screens. Each operator can set the display to optimise visibility of the job information most relevant to his/her operations.
- **Keep a pulse on your business.** JobPlus can analyse your revenue and costs by type of work, fleet, service and customer. Choose your level of reporting from full detail to executive summary.
- **Build a special relationship with your clients** with EDI transfer of consignments, web based job entry, track, trace and reporting functions.
- **Plug in to the world** with JobPlus's ability to collect data from or distribute data to Web sites, scanners and hand-held or vehicle mounted terminals.

SoftPlus has specialised in providing software to the transport, service and distribution industries for the past 10 years.

Our thorough understanding of industry needs coupled with a strong end-user focus has led to the production of software which is noted for its flexibility and ease of use.

SoftPlus's products are being enhanced continually and, in conjunction with our business partners, we can provide wide ranging solutions embracing technologies such as GPS, Internet, scanning and mobile data.

Other products include:

- **FreightPlus** - freight manifesting, rating, billing
- **StorPlus** - contract warehousing management.
- **FlexiJob** - job booking and dispatch for mobile based service operations
- **FleetPlus** - fleet maintenance costing & scheduling
- **Navman** - GPS tracking, vehicle monitoring and optional Mobile Data Terminal for the dispatch of jobs to your mobile workforce.

Our Clients say

Mark Darrah, General Manager, Reliance Transport

"Reliance Transport have been successfully operating the Storplus & Jobplus products since 1997. The team at softplus have been very supportive of our needs as a growing transport company in a fast moving technology driven environment".

Owen Ferguson, Bullet Freight Systems

"SoftPlus products have been a boon to our business since 1997, allowing the gain of cost and operational efficiencies and a marketing edge that will continue to facilitate business growth and enhanced service reputation for many years to come".

In the job search screen you may enter any mix of criteria in the top panel to search for matching jobs. Sort the resulting job list on any column with one click and zoom in on the full job details with a double click. You can reorder the columns to get the information most important to you on the front screen and save your settings for one-click future searches.

Dispatch

The power of the dispatch screen lies in its flexibility. Dispatchers can rearrange the columns in any order so that the job information most relevant to them is readily accessible.

Jobs may be grouped by:

- Fleet – to show loads and job progress
- Dispatch groups (operator defined categories, just like a dispatcher's pad eg wharf pickups, empties, general cartage).
- Job – to monitor progress of multi-item jobs

Regardless of grouping, the dispatcher can see job progress at a glance with the colour coded job status flashes.

Work can be split between dispatchers by defining combinations of dispatch groups and trucks. As these workload definitions can be saved, a dispatcher can switch instantly between his/her various types of jobs, or to another dispatcher's work.

Naturally, assigning or reassigning jobs to fleet, or changing due dates can be achieved with a few clicks and the screen can be rolled forward a day at a time to see forward bookings.

Is that container cleared? Double click on a container number to directly view the POA or Metro status!

Job Entry

JobPlus accommodates jobs ranging from single item, single leg general cartage through to multi-item, multi-leg movements, typical of container or vehicle work. With the ability to set customer defaults for many job settings and client specific pick up and drop off point lists, key punching is minimised.

Tracking

JobPlus knows all about multi-leg jobs and helps you to track them. One click in the search screen will show all jobs with a second leg pending and you can sort them by ship, demurrage date etc. to make sure none slip through the deadline.

JobPlus makes creation of a second leg easy by filling in the new pick up and drop off points automatically and it will put the new legs into special "MT" or "FULL" dispatch groups for easy tracking in the Dispatch screen.

Rating

JobPlus rating can be as simple as one rate per charge code (eg. 40' FULL) for a customer. However, point to point rates can be added with weight breaks and minimums and the basis may be any of weight, cubic, per item or hours.

Billing

The posting screen allows you to check your rating, apportion the revenue to your cost centres and build invoices from selected jobs – you have total control. JobPlus can produce weekly or monthly invoices and weekly or monthly statements with full transaction history available on screen. Should you wish to use your existing accounting package, JobPlus can export invoices to a variety of accounting packages such as MYOB and Exonet.
