

StorPlus comprehensively supports the operation and management of contract warehousing operations of any size and complexity. Multi-store, multi-branch operations, provision for scanning, EDI, web based reporting combined with extensive reporting and flexible billing make this a powerful tool.

- **Maintain accuracy** with StorPlus's robust two-step order entry and confirm process. No stock is committed until the put-away or pick is confirmed.
- **Build a special relationship with your clients** with EDI transfer of orders and Email or web based reporting and enquiries.
- **Do your storage billing at the touch of a button.** StorPlus's flexible billing structure accommodates a wide range of permutations of storage, handling and picking charges.
- **Improve productivity.** StorPlus's one click access to stock levels & locations and movement history means fast enquiry resolution. The ability to transfer outward orders to your freight package and billing details to your accounting package means data capture is truly one time only.

**SoftPlus** has specialised in providing software to the transport, service and distribution industries for the past 10 years.

Our thorough understanding of industry needs coupled with a strong end-user focus has led to the production of software which is noted for its flexibility and ease of use.

**SoftPlus's** products are being enhanced continually and, in conjunction with our business partners, we can provide wide ranging solutions embracing technologies such as GPS, Internet, scanning and mobile data.

#### Other products include

- **FreightPlus** - freight manifesting, rating, billing.
- \* **FlexiJob** - job booking and dispatch for mobile based service operations
- \* **FleetPlus** - fleet maintenance costing & scheduling
- \* **JobPlus** - general cartage and container movement.
- \* **Fleetcom** - vehicle/driver monitoring systems, including GPS and extensive performance analysis

*Our Clients say ....*

#### **Owen Ferguson, Bullet Freight Systems**

*"SoftPlus products have been a boon to our business over the past 5 years, allowing the gain of cost and operational efficiencies and a marketing edge that will continue to facilitate business growth and enhanced service reputation for many years to come".*

#### **Mike Guy, Cardinal Freight Distribution**

*"Cardinal Freight has enjoyed a mutually beneficial longstanding business partnership with SoftPlus.....we have found the product to be very conducive to our changing needs and they have always been supportive....We would have no hesitation in recommending SoftPlus..."*

#### **Our Mission**

Our Mission is to provide and support software solutions which work effectively for our clients and enhance their business.

#### **Our Promise**

We will do our utmost to ensure that the solutions we provide meet or exceed your expectations.

Should our software fail to meet the requirements set out in our mutually agreed specification, we will refund any monies paid in full.

## Order Entry

Both inwards and outward orders are processed in two steps – order entry and edit/confirm. This two step process ensures that no stock balances are updated until the order matches the actual pick or put away.

- As can be seen from the adjacent example
- Free text extra information may be stored with orders.
  - Items not applicable to the current product are disabled (the grey boxes), saving keystrokes and clearly defining product requirements.
  - Consignees may be picked from a drop down list, further minimising keystrokes.
  - An order may have multiple delivery points.
  - You can click the view stock button to view full details of stock levels, batches & locations.

Of course, you will be alerted if you ask for more stock than is available while entering an outward order.

## Order Confirmation

In the confirmation process you bring orders into line with what was physically picked or stored. You may enter or alter stock locations and order quantities and, only when you give the OK will stock balances be updated.

## Billing

StorPlus's billing mechanism allows for a variety of storage, handling and picking fee calculations. Storage charges may be based upon stock units, pallets, weight, cubic or a fixed charge, calculated from closing, average, maximum or total (opening + inwards) stock levels. Handling in and/or out charges are similarly flexible. Pallet based rates can be calculated from the actual pallet count or on a notional quantity derived from stock on hand divided by units per pallet. A fully itemised billing report is available for clients.

## Tracking / Enquiries

This is a vital part of StorPlus. The adjacent example shows that you can search for movements on a wide range of criteria and sort the search results on any column. The panel within the search results shows a stock summary obtained by double-clicking on a product.

In addition to the Movement History screen, the Movement Detail report can list all movements and a running balance for any product for a selected date range.

## Reporting

A wide range of reports is available to help you manage your operation. Client focussed reports include Movement, Stock and Order Summaries and Billing. Internal reports include the stocktake work sheet, pickface replenishment and revenue analysis.
